

Talented people drive growth and innovation. *We help find them.*

Your business faces challenges that are magnitudes greater than ever before – highly adaptable, nimble competition, shorter product lifecycles, and the need for technically-qualified, talented people to drive the productivity and innovation required of a market leader.

Innovation relies upon your IT infrastructure, which is only as productive as the people you recruit and place there. But many companies have determined that finding technical staff is not their core competency. Increasingly, companies turn to Pomeroy, where technical staffing is not just a specialty, but a major part of what we do for our clients and for ourselves. In fact, it is through our diverse skill sets that we deliver the greatest value to our clients.

- ◆ Application Development
- ◆ Network Administration/ Engineering
